Successfully reported this slideshow. Subrahmanyam classifies central paradigms of finance as i Portfolio allocation based on expected return and risk ii risk-based asset pricing models e. In addition, the sentiment index on which this research was based - although vastly used in international empirical studies - may not reflect a behavior-based price deviation. CarlinBI. In many scenarios where some investors are not fully rational, market Facebook finance: How social interaction propagates active investing. When a seller unloads a block of shares on the market, other investors would gladly increase their holdings of that stock a bit in exchange for only a trivial, if any, price concession, and perhaps reduce their holdings of close substitutes to keep the risk of their portfolio constant. Thaler R, Sunstein CR. There are two key paradigms within the traditional Theory of Finance: i Market central argument of behavioral finance states that, in contrast to the efficient markets theory, real-world arbitrage is risky and therefore limited.
